Managing Director of MBA Polymers China Elected to VP of Replas Steering Committee

Guangzhou, China, October 21, 2011 –Mr. Eric Wang, Managing Director of MBA China, was named VP of the Steering Committee for the plastics recycling Committee of the China Plastics Processing Industry Association PRC-CPPIA (China Replas, www.replas.org.cn), the largest organization of the Chinese scrap plastic recycling industry.

This group had its annual conference and trade show in Guangzhou, China on Nov. 6th and 7th, 2011. More than 500 distinguished guests from China and abroad and government officers from Chinese Environmental Protection Bureau (EPB), China Customs, AQSIQ and local authorities participated. During the conference, China Replas' steering committee elected Mr. Eric Wang, Managing Director Guangzhou GISE-MBA New Plastic Technology Co., Ltd. (GMP, www.gisemba.com), the Vice President of the committee and one of the steering committee directors. GMP is MBA Polymers' Chinese subsidiary (www.MBAPolymers.com).

Mr. Wang gave a presentation at the conference entitled "Post Consumer Recycled (PCR) Plastics Create Demands for Greener OEM Products." GMP's cutting edge high tech based plastic recycling processing was well received by the committee and related government officers. GMP recovers plastics from the residue from the recycling of waste electronics and electronics equipment (WEEE) from all over the world and sells its products to some of the largest IT, electronics and appliance manufacturers in the world and the facility has become a showcase for high-tech plastics recycling.
